# Pawel Domanski

Database Administrator  
Warsaw, Mazowieckie, Poland

## Summary

I have over 25 years of experience in both Oracle and Microsoft SQL Server database administration. Very good knowledge of issues related to the architecture, installation and management of databases both in project management, as well as everyday support for users and development teams. Very good knowledge of high availability tools (RAC in Oracle, AlwaysOn in SQL Server), backup systems such as IBM Spectrum Protect or NetWorker. Knowledge of programming and application servers allows me to solve problems faster. In many projects, my insight in solving problems and open approach can be invaluable help in new challenges.

---

## Experience

Dun & Bradstreet Europe  
Database Administrator  
September 2023 - Present (2 years 2 months)  
Warszawa, Woj. Mazowieckie, Polska

Kyndryl  
Database Administrator  
September 2021 - August 2023 (2 years)  
Warszawa, Woj. Mazowieckie, Polska

- 3rd Level support for 200 databases 9i/10g/12g/19g in single and HA instance, configuration running on Solaris, AIX, Linux and Windows
- performance troubleshooting. SQL and instance tuning and data structure optimization
- database provisioning and decommissioning
- implementing backup using OS scripts and RMAN
- prepare an environment for a development team
- implementation of new solutions in the field of database management
- implementation of automation in Ansible Ia databases

## IBM

### Microsoft SQL Server Administrator (DBA)

May 2015 - August 2021 (6 years 4 months)

Warsaw, Masovian District, Poland

- 2nd Level support for 2000 production Microsoft SQL Server databases running on Windows 2019/2008 Server, providing OLA for banking software development and customer support teams
- incident resolution, change implementation and problem troubleshooting. On-call support
- SQL Server database performance securing and tuning. Safety and performance audits at a customer site
- SQL Server installation, provisioning and migration at client site. Implementation of high availability and disaster recovery solutions – Log Shipping, Always On.
- software production support system's installation, configuration and administration
- creating, implementing and improving administration procedures
- performance troubleshooting. SQL and instance tuning and data structure optimization
- database provisioning and decommissioning
- 3rd Level support for 200 databases 9i/10g/12g/19g in single and HA instance , configuration running on Solaris, AIX, Linux and Windows
- performance troubleshooting. SQL and instance tuning and data structure optimization
- database provisioning and decommissioning
- implementing backup using OS scripts and RMAN
- prepare environment for development team

## Aviva

5 years 11 months

### Database Coordinator

January 2014 - April 2015 (1 year 4 months)

Warszawa, Woj. Mazowieckie, Polska

- managing the database team
- substantive and technical support of the team
