Why should you get trained and certified now?

1 Employers are seeking more skilled workers

The number of skills needed for a single role are increasing by 10% year on year, with employers seeking employees with multiple skills when hiring and retaining ([Udemy 2023](#))

2 Customers are trusting Oracle for their cloud workloads

Oracle has continued to grow year-on-year with significant brands (Uber, Zoom, Red Bull, JP Morgan, AT&T etc.) turning to Oracle for their cloud and application workloads ([Oracle Earnings](#))

3 Oracle's continually investing in the latest technology innovations

Oracle is a leader in 'enterprise AI' embedding our AI/ML capabilities in our core applications ([Oracle's AI Strategy](#)). Oracle is also integrating further with other vendors to help organizations embrace a multi-cloud environment ([Multi-Cloud is the new norm](#))

4 It's never been easier to learn

There are several mechanisms Oracle has introduced:

- **Hands On Performance Exams** – apply your practical knowledge in real-life scenarios
- [Oracle University Learning Community](#) – learn together from professionals around the globe

How do I get started?

1. Visit [Oracle MyLearn](#) to create your account, pick your learning path and book your exam
2. Check out the Oracle University Learning Community for our 'Race to Certification challenge' earning you points and prizes on completing tasks
3. Prepare for your exam by leveraging the exam preparation materials included in various learning paths, attending a live instructor led event, tuning into our Podcast or sparking a question in our Community
4. Share your certification success on socials - #Oracle Certified

Promo Period: June 1 – August 31st
